To be healthy we will…

- Continue to develop our shooting and passing skills in hocky.
- Explore a range of movement and combine moves together to create a routine in dance.

As leaders in our Faith we will…

- Begin our unit of Prophecy and Promise.
- Examine the parts of the Mass and the different parts within it.
- Reflect on the significance of Advent as a time of preparation.
- Look at the story of the annunciation to Joseph and examine what it means for us as Catholics.

As Scientists we will…

- Examine how two different types of rock are formed and compare their suitability for different purposes.
- Describe how fossils are formed, and examine the composition of soil.

As Writers we will…

- Examine the features of a diary entry and write our very own.
- Read a range of adventure stories and explore their common features.

As Mathematicians we will…

- Learn how to efficiently build the three, four and eight times tables.
- Begin to recall multiplication facts for these times tables quickly.
- Develop our mental methods for addition and subtraction.
- Evaluate methods such as bridging and number facts to choose the most efficient strategy.

As Designers we will…

- Examine a variety of products made using shell structures.
- Develop our folding, cutting and scoring skills through focused tasks.
- Design, make and evaluate a snack box for a specific target audience.

As Historians, we will…

- Examine how people's lives and settlements changed during the Stone Age, Bronze Age and Iron Age.
- Investigate what Skara Brae tells us about life during the Stone Age.
- Investigate the changes in people's lives during the Bronze Age.
- Discover what life was like in the Iron Age.

As Musicians we will…

- Learn to read, write and perform from western rhythm notation using 1, $\frac{1}{2}$, 2 and 4 beat notes and the 1 beat rest.
- Compose and perform rhythm compositions securely, fluidly and independently as part of a performance.
